reflecta 2000-AF

Short description:

Automatic slide projector of the compact class for three magazine systems. A well-priced product for outstanding projections.

Technical data and features:

- For three magazine systems
  Universal, CS, or LKM magazines can be used. The projector is adjusted to the magazine type by setting the lever on the slide changing arm to the appropriate position.
- Slide lift
  The slide lift makes the projector particularly suited for projecting individual slides. Gently press the slide lift down to open it to the top. Now, you can insert a slide from the side. This may also be helpful during a show.
- Halogen lamp 24 V / 150 Watt
  The lucent bright light of the halogen lamp illuminates your slides perfectly and projects the photo in brilliant colours.
- Anti-jam system
  The anti-jam system prevents slides from being jammed in the slide changing arm or being damaged. When the slide changing mechanism faces a defined resistance, the arm is disengaged to avoid damage.
- Thermal safety switch
  A powerful cooling fan ensures a projection which is gentle on your precious slides. A thermal safety switch switches the projector off when a critical temperature is reached.
- Lens
  reflecta Agomar 2.8 / 85 mm
- Cable remote control
- Focusing weel
- Ball-bearing precision lens guidance
- IR-Autofocussystem
- Weight 3.8 kg
- Dimensions 245 mm x 244 mm x 119 mm
- Made in Germany
